

HADISA FATIMA SYED

DATA SCIENTIST

Matiari, Pakistan • 03002067562 • hadisaasyed@gmail.com • [LinkedIn](#) • [Portfolio](#)

SUMMARY

Aspiring Data Scientist with expertise in data analysis, machine learning, predictive modeling, and visualization, supported by hands-on project experience. Proficient in Python, SQL, Tableau, Excel, deep learning, and workflow automation using N8N. Experienced in developing classification models, performing exploratory data analysis (EDA), and transforming raw data into meaningful insights and intelligent solutions. Eager to leverage AI, analytics, and data-driven strategies to solve complex real-world problems and drive innovation.

WORK EXPERIENCE

Data Science Intern (Remote) - 10Pearls

Apr, 2026 - Present

- Working on a weather prediction project using real-time and historical weather data collected through APIs over a 2-month period.
- Performing data cleaning, preprocessing, exploratory data analysis (EDA), and feature engineering to improve prediction accuracy.
- Developing and evaluating machine learning models for weather forecasting using Python and data science libraries.
- Collaborating remotely with the team to build data-driven solutions and present analytical insights.

Data Science Bootcamp - DataCrumbs

Dec, 2025 - Mar, 2026

- Developed 4+ AI and machine learning projects, including Cancer Detection using CNN, Machine Failure Prediction, AI Email Outreach Agent, and a Custom Knowledge Chatbot, along with several smaller analytics projects.
- Built predictive and deep learning models using Python, SQL, CNN, and Scikit-learn, achieving accuracies of up to 90%+ on structured and image datasets.
- Performed data cleaning, EDA, feature engineering, and model evaluation to generate actionable insights and improve model performance.
- Designed Streamlit applications, dashboards, and AI automation workflows to support efficient and data-driven solutions.

Data Science Intern - DevelopersHub Corporation

Jun, 2025 - Jul, 2025

- Built AI/ML models on Kaggle datasets to derive actionable insights.
 - Cleaned data, engineered features, and evaluated models for reliable predictions.
 - Visualized results and communicated insights to support decision-making.
 - Gained hands-on experience with Python, pandas, NumPy, and scikit-learn.
-

SKILLS

Data Cleaning & Wrangling, Exploratory Data Analysis (EDA), Data Visualization & Dashboards, SQL & Spreadsheets (Excel), Python (pandas, NumPy, matplotlib, seaborn, scikit-learn), Tableau & Power BI, Kaggle Projects, Business Insights & Reporting

PROJECTS

Analysis in Netflix Movies Dataset

Technologies: Python, Seaborn, Matplotlib, Numpy, Pandas

- Conducted comprehensive data wrangling to clean and preprocess Netflix movie datasets for analysis.
- Performed exploratory data analysis (EDA) to uncover patterns in movie genres, release years, ratings, and regional availability.
- Created insightful visualizations to highlight trends in content production, popularity, and viewer engagement.
- Generated actionable insights to inform content strategy decisions and understand audience preferences.

Military Expenditure Analysis (1960 - 2018)

Technologies: Spreadsheets, Tabulae, GitHub, Kaggle

- Analyzed 60+ years of military spending data across 50+ countries using Spreadsheets, Tabulae, GitHub, and Kaggle.
- Performed data cleaning, normalization, and transformation on 10,000+ records to ensure accuracy and consistency.
- Developed 20+ visualizations to identify trends, patterns, and anomalies in defense expenditures.
- Extracted actionable insights to support data-driven decision-making and comparative analysis.
- Strengthened skills in data analysis, data wrangling, visualization, and reporting.

Bloom Watch – Hackathon Project

Technologies: Streamlit, Python, Pandas, Matplotlib, seaborn, sklearn, numpy, GitHub, Kaggle, VS Code

- Developed an analysis tool to track blooming patterns of 100+ flower species, providing insights on seasonal changes, climate impact, and ecological trends.
- Utilized Python, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, and Streamlit to process, analyze, and visualize floral data.
- Built interactive dashboards to explore bloom timelines and geographic distributions.
- Managed project workflow using GitHub, Kaggle, and VS Code, enhancing collaboration and version control skills.
- Strengthened skills in data analysis, visualization, predictive modeling, and ecological data interpretation.

EDUCATION

Dec 2022 - Present

Bachelors in Software Engineering

Mehran University of Engineering & Technology, Jamshoro
